Test Practical: instructor key

25 stations. Forms AB, CD, AC, BD, AD, BC. Questions are worth 1 pt unless marked.

Station 1: kidney model

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pin A.	renal pelvis		
B	Name the structure at pin B.	renal pyramid		
C	Name the structure at pin C.	renal cortex cortex		
D	Name the structure at pin D.	ureter		

Station 2: kidney slide

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pointer A.	cortex renal cortex		
B	Name the structure at pointer B.	medulla renal medulla		
C	Name the structure at pointer C.	renal column		
D	Name the structure at pointer D.	renal capsule capsule	simple columnar epithelium	

Station 3: urinary system model

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pin A.	urethra		
B	Name the structure at pin B.	kidney		
C	Name the structure at pin C.	urinary bladder bladder		
D	Name the structure at pin D.	ureter		

Station 4: glomerulus slide

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pointer A.	simple squamous epithelium Simple squamous	stratified squamous epithelium	
B	Name the structure at pointer B.	fenestrated capillary fenestrated		
C	Name the structure at pointer C.	glomerulus		
D	Name the structure at pointer D.	podocyte		

Station 5: bladder model

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pin A.	ureter		
B	Name the structure at pin B.	urinary bladder bladder		
C	Name the structure at pin C.	detrusor muscle detrusor		
D	Name the structure at pin D.	internal urethral sphincter		

Station 6: nephron model

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pin A.	afferent arteriole afferent artery	afferent vessel Afferent capillary	
B	Name the structure at pin B.	vasa recta		
C	Name the structure at pin C.	efferent arteriole		
D	Name the structure at pin D.	peritubular capillaries		

Station 7: food tests 1

Q	Question	Full credit	Partial credit	Pts
A	Which macromolecule does the result in tube A show?	protein	amino acids	
B	Which macromolecule does the result in tube B show?	carbohydrates Amylose Starch starches	Glucose Sugar	
C	Which macromolecule does the result in tube C show?	lipid fat		
D	Which macromolecule does the result in tube D show?	nucleic acid		

Station 8: food tests 2

Q	Question	Full credit	Partial credit	Pts
A	Which macromolecule does the result in tube A show?	amylose starch	carbohydrates	
B	Which macromolecule does the result in tube B show?	sugars monosaccharides glucose simple sugars		
C	Which macromolecule does the result in tube C show?	protein		
D	Which macromolecule does the result in tube D show?	lipids fats		

Station 9: female pelvis model

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pin A.	uterine tube Fallopian tubes Fallopian tube		
B	Name the structure at pin B.	body uterus Body of uterus		
C	Name the structure at pin C.	ovary		
D	Name the structure at pin D.	cervix		

Station 10: external genitalia, female

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pin A.	labia majora		
B	Name the structure at pin B.	labia minora	Labia	
C	Name the structure at pin C.	clitoris		
D	Name the structure at pin D.	vagina		

Station 11: female pelvis, midsagittal

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pin A.	rectum		
B	Name the structure at pin B.	uterus		
C	Name the structure at pin C.	urinary bladder		
D	Name the structure at pin D.	vagina		

Station 12: ovary model

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pin A.	fimbriae		
B	Name the structure at pin B.	ovary		
C	Name the structure at pin C.	ovarian ligament		
D	Name the structure at pin D.	broad ligament		

Station 13: large intestine

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pin A.	descending colon		
B	Name the structure at pin B.	ascending colon		
C	Name the structure at pin C.	transverse colon		
D	Name the structure at pin D.	sigmoid colon		

Station 14: penis cross-section

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pin A.	glans penis	Penis	
B	Name the structure at pin B.	penis		
C	Name the structure at pin C.	corpus spongiosum		
D	Name the structure at pin D.	corpora cavernosa corpus cavernosum		

Station 15: male pelvis model

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pin A.	seminal vesicle seminal gland		
B	Name the structure at pin B.	scrotum	Testes	
C	Name the structure at pin C.	testis testes		
D	Name the structure at pin D.	epididymis		

Station 16: male accessory glands

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pin A.	prostate gland prostate		
B	Name the structure at pin B.	ejaculatory duct ductus deferens vas deferens		
C	Name the structure at pin C.	bulbourethral gland		
D	Name the structure at pin D.	urethra		

Station 17: external genitalia, female 2

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pin A.	vulva genitals		
B	Name the structure at pin B.	mons pubis		
C	Name the structure at pin C.	perineum		
D	Name the structure at pin D.	vestibule		

Station 18: cecum

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pin A.	appendix vermiform appendix		
B	Name the structure at pin B.	transverse colon		
C	Name the structure at pin C.	cecum		
D	Name the structure at pin D.	ileum		

Station 19: abdominal organs

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pin A.	liver		
B	Name the structure at pin B.	esophagus		
C	Name the structure at pin C.	stomach		
D	Name the structure at pin D.	spleen		

Station 20: pancreas and duodenum

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pin A.	pancreas		
B	Name the structure at pin B.	duodenum		
C	Name the structure at pin C.	jejunum		
D	Name the structure at pin D.	common bile duct		

Station 21: gallbladder

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pin A.	gall bladder gallbladder		
B	Name the structure at pin B.	small intestine		
C	Name the structure at pin C.	cystic duct		
D	Name the structure at pin D.	common hepatic duct hepatic duct		

Station 22: stomach

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pin A.	rugae		
B	Name the structure at pin B.	pyloric sphincter		
C	Name the structure at pin C.	fundus		
D	Name the structure at pin D.	cardia cardiac region		

Station 23: oral cavity

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pin A.	anus external anal sphincter	rectum	
B	Name the structure at pin B.	tongue		
C	Name the structure at pin C.	hard palate		
D	Name the structure at pin D.	soft palate		

Station 24: digestive enzymes

Q	Question	Full credit	Partial credit	Pts
A	Name the secretion described in row A.	bile		2 pts
B	Name the secretion described in row B.	pancreatic lipase lipase		
C	Name the secretion described in row C.	pepsin		
D	Name the secretion described in row D.	salivary amylase amylase		

Station 25: digestive histology

Q	Question	Full credit	Partial credit	Pts
A	Name the structure at pointer A.	simple columnar epithelium Simple Columnar	Columnar	
B	Name the structure at pointer B.	pharynx nasopharynx oropharynx laryngopharynx		
C	Name the structure at pointer C.	esophagus		
D	Name the structure at pointer D.	larynx
